Optional Design Ideas:

Change the master bedroom door to the deck to a large window

Install built-in pull-out drawers in the bedroom #3 storage area

Choose a stackable washer/dryer for the utility room. Then move the sink to the left wall and you can easily grow the kitchen area floorspace by shortening the L-R width of the oversized utility area!

Move the gathering room fireplace next to the stairs and put (2) large windows on the right side

Move the master bath window to the north wall and you create space to install a massive floor to ceiling walk-in shower where the tub is currently shown
