Premier Home Series

 Gambrel Garage
 26'x32'

 Can be done in Solid
 Log w/log siding Gables
 or
 Log Siding w/finish trim
 corners

 Pricing information
 available for download
 from our website

Optional Design Ideas:

Garages can be done in either solid log (with solid log gables) or done in log siding.

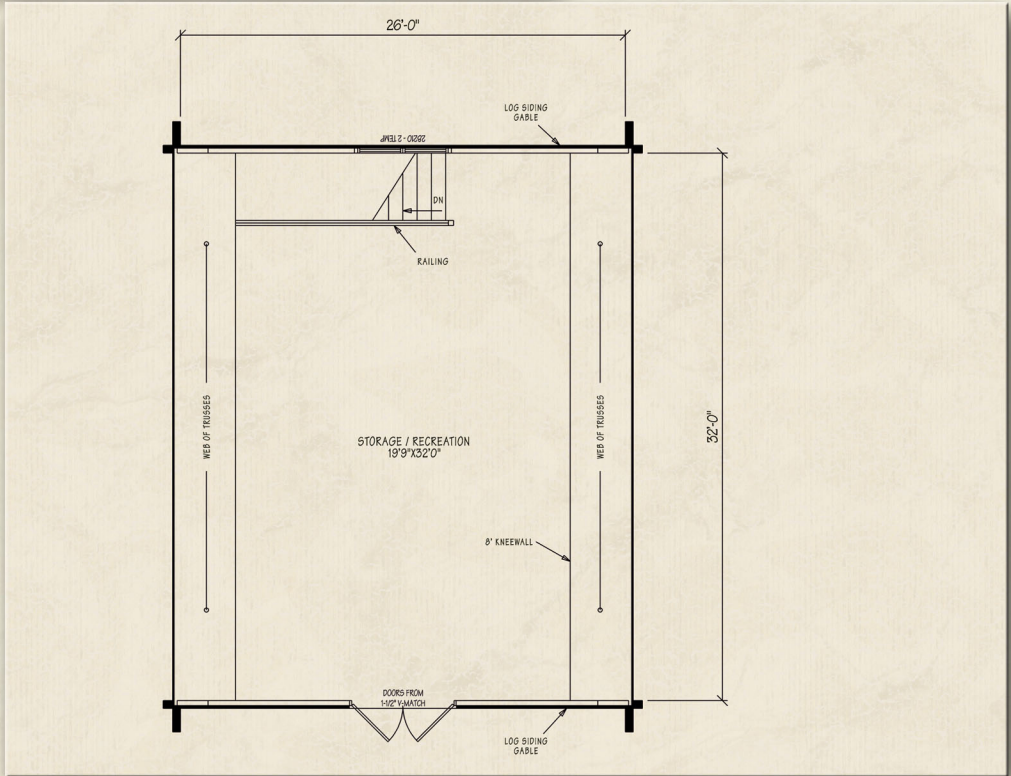

26'x32' is the standard Gambrel Garage Size

Solid log garages will have standard log projections extending at the corners (same as a solid log house--see the gambrel garage example above). The log siding gambrel garage will have finish trim corners

Log siding corner projections can easily be added to a log siding garage to match the classic corner style of a house

A cupola (by others) can be a wonderful design addition to the roof area

Consider slightly enlarging the overall size for generating a bit of extra storage area
