Optional Design Ideas:

Remove the partition between bedroom #1 and bedroom #2 to make a master bedroom suite on the first floor

Now, the first floor bath can be repurposed to a guest bath, and with adding a bedroom to the at grade area, you can instantly create a terrific three bedroom getaway home.

Utilize built-in drawers with full extension glides in that second floor at the storage area--this removes the need for a bureau or other lowboy piece of furniture in that room, giving it more space

Change the front porch full log gable over to the look of an open beam truss.

(See the Sportsman in our Camp & Cabin series for an illustration of what that exterior truss idea would look like!)
